

Experience of Care Survey

2015 Maryland Nursing Facility Short Stay Resident Survey

The Maryland Health Care Commission conducts “Experience of Care Surveys” every other year to collect information about how nursing home residents and their family member or responsible party rate the care, communication, environment and other key aspects of their nursing home stay. The survey was not administered in 2016.

The Short Stay Resident Survey is designed to measure experience of residents recently discharged from nursing homes after a stay of no more than 100 days, usually after an illness or following surgery requiring rehabilitation. Only residents of nursing homes discharging 25 or more residents per month will have the opportunity to complete this survey.

To find a nursing home report:

- Go to [Services Search](#) on main page.
- On the [Search by Facility Type](#) tab,
 - Step # 1 select **Nursing Home**
 - Step # 2 select **SELECT ALL** *
 - Step # 3 click on the **Search** button

The nursing homes will list in alphabetical order beneath the map.

- Select a specific nursing home by double clicking on the name. A page for the selected nursing home will appear.
- Scroll down to **Facility Characteristics** (located on the left hand side of the screen)
- Select the “**Family or Resident Experience of Care**” tab to view results. Links for both the Family Experience of Care and the Short Stay Resident Experience of Care will appear.

* If you know the facility name and the county where it is located, in Step # 2 check the box next to the county name, then go to Step # 3 to click on the **Search** button.

There are 112 nursing home short stay resident reports available out of 171 eligible facilities. To maintain respondent confidentiality, survey reports were not generated for 59 facilities for which 10 or less resident surveys were received.

Facilities in **bold** are hospital-based nursing home beds.
