

GUY CAPPUCCINO, M.D., PLASTIC AND RECONSTRUCTIVE SURGERY SAYS:

“THE SINGLE BEST DECISION I MADE WAS TO BUY NEXTECH.”

Dr. Cappuccino runs a successful and thriving plastic and reconstructive practice in Mt. Airy, Maryland. Utilizing NexTech practice management and EMR he was able to take an extremely user friendly software and customize it to his practice, thus allowing the practice to be paperless and efficient from day one. This efficiency allows him to concentrate efforts on providing the best care possible to the patients that he serves.

According to Dr. Cappuccino, “The single best decision I made was to buy NexTech. I considered less expensive software packages, but after extensive research including speaking to established practices, I was convinced. NexTech worked with my limited budget to get the package I needed from the start. Since then NexTech supported me every step of the way, from hardware purchasing, EMR implementation, on-site training, and program customization.”

Dr. Cappuccino further stated: “The best part of having NexTech is the technical support. A live person is only a phone call away, ready and capable to handle any situation.”

NEXTECH’S (EMR) ELECTRONIC MEDICAL RECORDS SOFTWARE IS DESIGNED FOR MAXIMUM EFFICIENCY AND IS FULLY INTEGRATED WITH OUR PRACTICE MANAGEMENT SYSTEM. NEXTECH EMR MAKES YOUR PRACTICE PAPERLESS, ELIMINATING WASTED TIME THUMBING THROUGH PAPER CHARTS.

NexTech EMR is able to quickly capture all data surrounding the patient visit and eliminates the need for paper files. Information is at your fingertips. NexTech Practice 2010 is CCHIT 2008 Ambulatory certified; furthermore the Erx (electronic prescribing) feature allows providers to submit prescriptions directly to the patient’s pharmacy, identify drug-drug interactions and access formulary listings.

Users have the ability to utilize point and click templates, dictate notes directly into the patient record or use a combination of both approaches. An EMR specialist is assigned to your practice. The specialist will aid and guide in making NexEMR specific to your practice. All EMR fields are stored as data for ease and immediacy of querying reports for legal, peer, or insurance needs. NexTech EMR allows users to document and analyze clinical services, outcomes, and prescription histories.

It also allows users to lock and audit all historical data that has been collected as part of the patient record.

NexTech EMR has easily customizable templates specific to Plastic and Reconstructive Surgery, Dermatology and Dermatological Surgery, ENT, Facial Plastic Surgery, Oculoplastics, Bariatric Surgery, Refractive/LASIK Surgery, and Reproductive/Fertility Medicine. The software allows users to draw

directly on anatomical diagrams as well as patient photos. Patients have the ability to sign consents on a touch screen. Users have the ability to sign chart notes on a touch screen.

NexTech EMR gives users the ability to attach audio files, documents, dictations, and images directly within the EMR. Furthermore, users can import and attach lab results and other patient related reports into EMR. Users can also generate referring doctor letters directly through EMR, and quote or a bill a patient directly from EMR.

Users can also enter patient medical history through the use of the NexWeb patient portal, thus making the patient visit streamlined and more efficient. In addition, an E&M checklist is within the program to assist with coding.

ASAPS/ ASPS Cycle of Care® is integrated within NexEMR.

Users are also able to check spelling on all EMR details with the latest medical terminology dictionary.
