

**Question 1:** Item 9 requests the current physical capacity in Column 1. The response reports the number of licensed beds. While staff appreciates the comparison between the current number of licensed and the proposed capacity, please report the existing physical capacity as requested. Specify the location and current use of all physical bed capacity as was done in the 2009 CON application for a similar project. Complete the attached bed inventory spreadsheet.

## Actual Physical Bed Capacity Before And After The Project

**Washington Adventist Hospital 2013 Relocation CON**

**11/20/2013**

Location  (Floor/Wing)			Existing Physical Capacity				Location  (Floor/Wing)	After Project Completion				
	Hospital Service	Licensed July, 2013	Room Count			Bed Count		Hospital Service	Room Count			Bed Count
			Total Rooms	Semi- Private	Private	Physical Capacity			Total Rooms	Semi- Private	Private	Physical Capacity
TCU LL 1	MSGa (cv)		8	0	8	8						
2200 2nd	MSGa (neuro/ortho)		30	9	20	38						
2500 2nd	MSGa (cv)		17	14	3	31	3rd	MSGa (cv)	32	0	32	32

Total		252	214	91	123	311	Total		241	0	241	241

Note: Physical capacity is the total number of beds that could be accommodated without significant renovations. A room with two headwalls and two sets of gasses is a semi-private room, even if it is typically set up and operated with only one bed. A room with one headwall and one set of gasses is counted as a private room, even if it is large enough, from a square footage perspective, to be used as a semi-private room, since renovation/construction would be required to convert it to semi-private use. If the hospital operates patient rooms that contain a single headwall, but are used to accommodate more than one patient (e.g., for psychiatric patients), the physical capacity of such rooms is semi-private, and the bed capacity is as applicable.
