Guiding Discussion Questions

Rural Health Care Delivery Workgroup- Workforce Advisory Group

October 21th, 2016

- 1) In terms of health care delivery, what are the greatest areas of workforce shortages in rural Maryland/five jurisdictions of interest?
- 2) In terms of current programs, what is working and what is not working? How is “success” or “what is working” determined or evaluated?
- 3) What are the essential components to creating, implementing and sustaining successful workforce programs in rural areas? Are there current models that could be explored/replicated?
- 4) How can innovative programs that work to recruit or retain providers be sustained?
- 5) Are there specific regulatory barriers to maintaining an adequate workforce in rural areas?
