Key Discussion Items

- The Track 3 Committee continued its review of Primary Care First elements with the purpose of developing a framework for an advanced care delivery option for MDPCP practices. Discussion topics included participants and partners, seriously ill populations (SIP), the learning system and practice coaching, and data sharing and reporting, and Quality Payment Program overlap.
- The PMO outlined next steps for submitting draft considerations for discussion to CMMI for preliminary feedback, and presenting Committee outcomes to the MDPCP Advisory Council for further deliberation. The Advisory Council will review work products of the Committee and preliminary feedback from CMMI and contribute to finalizing draft recommendations to be submitted to CMMI in September.
