#### MARYLAND HEALTH CARE COMMISSION

4160 PATTERSON AVENUE – BALTIMORE, MARYLAND 21215 TELEPHONE: 410-764-3460 FAX: 410-358-1236

December 1, 2015

Final 2016 Quality and Performance Reporting Requirements (QPRR) This document contains the 2016 reporting requirements for commercial health benefit plans required to participate in Maryland's Health Benefit Plan Quality and Performance Evaluation System. Commercial health benefit plans, including HMOs, POSs, PPOs, EPOs, or other similar entities, shall be required to submit data for quality and performance measures using either the NCQA Interactive Data Submission System (IDSS) tool or the free HDC Benchmarking tool. All reporting will be for services provided during calendar year 2015 and shall continue to include Maryland-only data. In order to differentiate Maryland-only data from book-of-business data, commercial health benefit plans shall determine whether a member is a Maryland resident based on the member's residency in the State of Maryland on December 31st of the 2015

All QPRR measures are derived from the following quality and performance measurement instruments to address public health issues of particular importance in the State of Maryland:

- The Maryland RELICC Assessment™ Customized for the State of Maryland by the Mid-Atlantic Business Group on Health/National Business Coalition on Health, and focuses on race/ethnicity, language, interpreters, and cultural competency issues
- The Maryland Plan Behavioral Health Assessment A Maryland-specific quality measurement instrument which focuses on the medical and behavioral health care provider network
- The Maryland Health Plan Quality Profile A Maryland-specific quality measurement instrument which focuses on disparities reduction efforts within the State and continuous quality improvement initiatives
- National Committee for Quality Assurance's Healthcare Effectiveness Data and Information Set (HEDIS®)- A widely used quality measurement instrument which focuses on clinical performance
- Agency for Healthcare Research and Quality's Consumer Assessment of Healthcare Providers and Systems (CAHPS®) survey – A widely used quality measurement instrument which focuses on member satisfaction with their experience of care

In accordance with the Code of Maryland Regulations **COMAR 10.25.08**, **all carriers are required to participate** in the Health Benefit Plan Quality and Performance Evaluation System if they meet the following criteria:

- Hold a certificate of authority in the State of Maryland from the Maryland Insurance Administration
- Have a premium volume in Maryland for each category of health benefit plan that exceeds \$1,000,000
- Have 65 percent or fewer of its Maryland enrollees covered through the Medicaid and Medicare Programs (as reported in an annual statement submitted by a carrier to the MHCC that includes premium volume and enrollment percentages for the calendar year preceding the reporting period)

A carrier may request a *Notice of Exemption* from participating in the Health Benefit Plan Quality and Performance Evaluation System from MHCC. Please forward such requests to the attention of the Chief, Health Benefit Plan Quality and Performance. As part of the written request, a carrier must also present clear evidence that shows the carrier does not meet the minimum criteria for participation as defined by COMAR 10.25.08.

### **Carriers Required to Submit Performance Data to MHCC in 2016**

A carrier shall report on products individually or in MHCC-authorized product combinations. The table below indicates the various authorized product combinations of Health Maintenance Organization (HMO) plans, Point Of Service (POS) plans, Exclusive Provider Organization (EPO) plans, or other types of health benefit plans. If a carrier has a health benefit plan not listed below that meets the regulatory criteria in COMAR 10.25.08, the carrier is required to notify MHCC. Please forward such notification to the attention of the Health Benefit Plan Quality and Performance Chief or appointed representative.

	Report Name	Health Plan Name	Individual or Authorized Combination
	Aetna HMO	Aetna Health, Inc. (Pennsylvania) – Maryland	HMO/POS
tna	Coventry HMO	Coventry Health Care of Delaware, Inc.	HMO/POS

these		plan		
measures shall	by	For each healthcare discipline including behavioral health,		
be provided by		provide the number of network providers located in	1	
the audit vendor		Maryland and in the health benefit plan's overall service area		
		(Psychiatry, Psychology, Social Work, Nurse		
		Psychotherapists, Certified Professional Counselors, and		Required
		Licensed Clinical Alcohol and Drug Counselors, plus,		
		corresponding to the BCR measure, family medicine, internal		
		medicine, OB/GYN physicians, Pediatricians, Geriatricians,		
		and other physician specialists)		
		Provide the percentage of network physicians, including		
		psychiatrists, plus, corresponding to the BCR measure,		
		family medicine, internal medicine, OB/GYN physicians,		
		Pediatricians, Geriatricians, and other physician specialists,		Required
		located in Maryland and in the health benefit plan's overall		
		service area who are Board Certified		

		Maryland Health Plan Quality Profile	
Plan shall provide a Quality Profile	QP	Each carrier shall submit a two to three page summary of their quality assurance and quality improvement initiatives. The summary shall be consistent with the overarching theme of: "Understanding and Addressing Disparities." The theme shall focus on actions taken by each carrier toward implementing progressive programs that respond to improving methods for collecting and reporting RELICC-related information.  2016 Theme Focus is on: Network adequacy/provider directory accuracy Note: Per request, new due date is January 31.	Required
to the audit vendor		Each carrier shall submit a Product Summary Table listing each of the products being marketed under each health benefit plan legal entity name. For each of the listed products, the carrier shall specify whether the product is offered in the individual or small group market, whether inside or outside the Exchange, or both, and shall identify the type of delivery system (HMO, POS, PPO, EPO, or other – please specify). In addition, the number of enrolled members and annual premium volume for each product shall be specified; plus the tax status and ownership of the legal entity shall also be described.	Required

# 2016 Required Measure for RELICC Supplemental Member Level Detail File Submissions

#### **TLM Detail File - Total Membership**

For each IDSS or HDC Benchmarking submission, the carrier will submit one Race/Ethnicity, Language, Interpreters, and Cultural Competency (RELICC) Member Level Detail File (MLDF) for the required measure(s) highlighted above. Using a payer-encryption process that maintains the privacy of a member's protected health information, each RELICC MLDF shall contain separate member specific data for each member that is counted in the eligible population for the required measure. This RELICC MLDF submission is similar to the Patient-Level Data File required for Medicare Managed Care Contractor organizations. The RELICC MLDF submissions shall be due by July 1, 2016.

Regarding all RELICC data elements being reported, the direct method of reporting is preferred and Health Benefit Plans should make every reasonable effort to obtain direct information when sources are available. Through a collaborative process, MHCC has chosen to allow individual carriers to define what entails a "reasonable" effort. The method for determination of RELICC data elements shall be reported as a direct method only when the member self-reports or reports for dependents, via survey, telephone calls, etc. Probability of race/ethnicity,language, etc. shall be reported at 100% only when using the direct method. For Health BenefitPlans that do not have information related to the RELICC data elements directly available on the commercial population, the use of indirect methods to gather and report on this informationhas been authorized. The method for determination of RELICC data elements shall be reported as an indirect method if a program or process is being used to ascertain a probability of race/ethnicity, language, etc. via geo-coding, surname analysis, etc. Probability of race/ethnicity, language, etc. shall also be reported when using the indirect method and shall be rounded to the nearest one hundredth of a percent.

With Maryland law extending marriage to same-sex couples, in addition to recognizing same-sex marriages performed in other jurisdictions, emerging important elements of demographic data include the following: relationship status, sexual orientation, sex, and gender identity. Another important element of demographic data is disability status, which include the following disability types: hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, and independent living difficulty. For each of these demographic data elements please use the appropriate options listed in the Value Codes table. Particular attention must be paid to sex and gender identity data to ensure that the data collected are useful, comprehensible and reflective of the lived experiences of all Marylanders. Health Benefit Plans should consider opportunities to gather and report more accurately on these emerging important elements of demographic data. (See Appendix A)

For the purpose of promoting health equity and eliminating health disparities, health benefit plans shall employ every reasonable effort to be more comprehensive in collecting voluntary RELICC data from their members. Following are the data elements required for reporting:

Organization Name Date of Birth

Product Type Method of Determination for Race/Ethnicity

Payer-Encrypted Member ID Stated or Imputed Race/Ethnicity (≥1 race option is allowed)
Payer-Encrypted Member UUID Corresponding Probabilities - Race/Ethnicity (all categories)

Residence Zip Code+4 Country of Birth (write in)

Residence County
Relationship Status
Method of Determination for Preferred Spoken Language
Preferred Spoken Language (for health-related encounter)
Sexual Orientation
Corresponding Probabilities - Preferred Spoken Language

Sex Assigned At Birth Disability Status (Yes/No/Decline)

Current Gender Identity Member Months

## Format for RELICC Member Level File Submissions

Please submit each Member Level Detail File as a fixed-width ASCII text file with all fields completed using the format described below, and also using appropriate value codes described in the Value Codes Table

Data Element	Position	Description/Value Codes
Organization Name	1-30	List name of organization, truncate or abbreviate only
		if needed to fit in the space provided.
		Up to 30 alpha-numeric characters. (Left justified)
Product Type	31-55	List the product type using the following options:
		• HMO
		HMO Combo (POS/EPO/other)
		• PPO
		PPO Combo (POS/EPO/other)
		If there are unique products that require additional
		options not listed above, please specify and provide a
		mapping document so that the data file(s) can be
		normalized for analysis.
David Francis d March and D	56.05	Up to 25 alpha-numeric characters. (Left justified)
Payer-Encrypted Member ID	56-85	List the member's randomly generated, unique payer-
		encrypted identification number. Rather than using the names of each member, the payer-encrypted ID
		shall be generated by the Health Benefit Plan to
		identify each of the members in the file.
		Up to 30 alpha-numeric characters. (Left justified)
Payer-Encrypted Member UUID	86-115	List the member's universally unique identifier. The
		UUID shall be generated by the Health Benefit Plan
		and shall be consistent with the UUID number used
		by the Health Benefit Plan for Medical Care Data
		Base (MCDB) reporting to the Maryland Health Care
		Commission (MHCC). Every member in the member
		level files is required to have both a unique payer-
		encrypted ID and UUID. Please check for and
		reconcile all duplicates before completing your submission.
		Up to 30 alpha-numeric characters. (Left justified)
Decidence Zin Code: 4	116 104	
Residence Zip Code+4	116-124	List the member's primary residential Maryland zip code plus four-digit add on code.
		Up to 9 numeric characters. (Left justified)
Residence County	125-126	List the member's primary Maryland county of
1 tooldorloo Godility	123 120	residence using the appropriate value code as defined in
		the Value Codes table below.
		Up to 2 alpha characters. (Left justified)
Relationship Status	127-128	List the member's relationship status using the
	12, 120	appropriate value code as defined in the Value Codes
		table below.
		Up to 2 alpha characters. (Left justified)
		1 1

Sexual Orientation	129-130	List the member's sexual orientation using the appropriate value code as defined in the ValueCodes table below.  Up to 2 alpha characters. (Left justified)
Sex Assigned At Birth	131	List the member's sex assigned at birth using the appropriate value code as defined in the Value Codes table below.  Up to 1 alpha character. (Left justified)
Current Gender Identity	132-133	List the member's current gender identity using the appropriate value code as defined in the Value Codes table below.  Up to 2 alpha characters. (Left justified)
Date of Birth	134-141	List the member's date of birth and substitute two zeros for the day component of the member's date of birth, in the format mm00yyyy. Every member shall have a populated date of birth.  Up to 8 numeric characters. (Left justified)
Method of Determination for Member's Race	142	List "D" to indicate that race determination was by a direct method; "I" to indicate that race determination was by any indirect method; or "0" if you are not using any program to establish probability of race and you do not know the member's race via the direct or indirect method.  Up to 1 alpha-numeric character. (Left justified)
Member's Stated Race (at 100% probability) or Imputed Race (at <100% probability) with Corresponding Probability	143-206	For each race option, use the appropriate 2-character value code(s) as defined in the Value Codes table below, to list the member's stated or imputed race(s) with corresponding 6-character probability percent rounded to the nearest one hundredths percent. Stated race, which is known via direct means, shall be listed with a corresponding probability of 100.00%. Please allow for multiple race options and report each race option in the order stated in the Value Codes table with "00" listed for a race option that is not known by direct means (e.g., In the order "WH-BL-AI-AS-NH-OT-DA-UN," if a member reports they are white and African American, report the race as follows "WH100.00BL100.0000000.00000000000000000000

Mother of of Determine the start	207	T: ((T)) (1
Method of Determination for Member's Ethnicity  Member's Stated Ethnicity (at	207	List "D" that ethnicity determination was by any direct method or "I" to indicate that ethnicity determination was by indirect method; put a "0" if you are not using any program to establish the probability of ethnicity or you do not know it via the direct or indirect method; up to 1 alpha-numeric character. (Left justified)  For each ethnicity option, use the appropriate 3-
100% probability) or Imputed Ethnicity (at <100% probability) with Corresponding Probability		character value code(s) as defined in the Value Codes table below, to list the member's stated or imputed race(s) with corresponding 6-character probability percent rounded to the nearest one hundredths percent. Stated ethnicity, which is known via direct means, shall be listed with a corresponding probability of 100.00%. Please allow for multiple ethnicity options and report each ethnicity option in the order stated in the Value Codes table with "00" listed for an ethnicity option that is not known by direct means (e.g., In the order "HIS-NOT-DTA-UNK," if a member reports they are not Hispanic, report the ethnicity as follows "000000.00NOT100.00000000.000000000.00", and if a member's ethnicity is altogether unknown by direct and indirect means, report the stated and imputed ethnicity with corresponding probabilities using all zeros as follows 000000000000000000000000000000000000
Member's Country of Birth	244-273	Write in birth country; truncate or abbreviate only if needed to fit in the space provided. (e.g., if member is associated with US military and born in the Democratic Republic of the Congo, list Democratic Republic - Congo as country of birth because by virtue of having a significant international experience, that member is likely to possess a greater degree of cultural competence.) Up to 30 alpha characters. (Left justified)
Method of Determination for Member's Preferred Spoken Language	274	List "D" that preferred spoken language determination was by any direct method or "I" to indicate that preferred spoken language determination was by indirect method; put a "0" if you are not using any program to establish the probability of preferred spoken language or you do not know it via the direct or indirect method. Up to 1 alpha-numeric character. (Left justified)

Member's Preferred Spoken Language (at 100% probability) or Imputed Preferred Spoken Language (at <100% probability) with Corresponding Probability	275-319	For each Preferred Spoken Language for a health-related encounter option, use the appropriate 3-character value code(s) as defined in the Value Codes table below, to list the member's stated or imputed Preferred Spoken Language with corresponding 6-character probability percent rounded to the nearest one hundredths percent. Stated Preferred Spoken Language, which is known via direct means, shall be listed with a corresponding probability of 100.00%. Please allow for multiple Preferred Spoken Language options and report each Preferred Spoken Language option in the order stated in the Value Codes table with "00" listed for a Preferred Spoken Language option that is not known by direct means (e.g., In the order "ENG-SPA-NOT-DTA-UNK," if a member reports their preferred spoken language is Spanish, report the Preferred Spoken Language as follows "000000.00SPA100.00000000.0000000000000000000000000
Mambar'a Disability Status	220, 222	000). Up to 45 alpha-numeric characters. (Left justified)
Member's Disability Status	320-322	For each Disability Status option, use the appropriate 3-digit value code as defined in the Value Codes table below, to list the member's stated Disability Status. Note that members who report yes to any one of the six disability types are considered to have a disability (hearing, vision, cognitive, ambulatory, self-care, or independent living difficulty)
Member Months	323-324	The number of months the member was enrolled during the measurement year. The member specific data should be consistent with the total membership as reflected in the Total Membership (TLM) measure. Up to 2 numeric characters. (Left justified)

#### **APPENDIX A**

With Maryland law now extending marriage to same-sex couples in addition to recognizing same-sex marriages performed in other jurisdictions, emerging important elements of demographic data include the following: relationship status, sexual orientation, sex, and gender identity. Particular attention must be paid to sex and gender identity data to ensure that the data collected are useful, comprehensible, and reflective of the lived experiences of all Marylanders. Health Benefit Plans should consider opportunities to gather and report more accurately on these emerging important elements of demographic data.

- A. Relationship Status. Research shows that family structures in America today are increasingly varied:
  - Only 25 percent of American households consist of a married man and woman and their children.<sup>1</sup>
  - According to 2010 Census data, Maryland is home to over 12,500 same-sex couples.<sup>2</sup>
  - Over 2,500 of these couples are raising children.<sup>3</sup>

In order to accurately reflect Maryland's families, Health Benefit Plans must work toward being able to capture information about diverse family structures. The question below is based on relationship status questions developed by the U.S. Census Bureau<sup>4</sup> and is reflective of the diversity of relationships legally recognized by Maryland, which include same- and different-sex domestic partnerships, civil unions, and marriages. As a corollary to the expansion of demographic data elements, in the relationship status question, Health Benefit Plans may want to consider the use of "Parent 1" and "Parent 2" instead of "Mother" and "Father."

Health Benefit Plans shall consider the following possible responses to the question:

What is your relationship status?

- Single
- Married to an opposite-sex spouse
- · Married to a same-sex spouse
- In an opposite-sex domestic partnership or civil union
- In a same-sex domestic partnership or civil union
- Divorced
- Widowed
- B. Sexual Orientation. In order to better understand the significant health disparities associated with minority sexual orientation, Health Benefit Plans may want to consider collecting optional data on the sexual orientation of applicants. The question below is based on research by the Williams Institute, a national sexual orientation and gender identity law and policy think tank at the UCLA School of Law.<sup>5</sup> It is currently being used on numerous state and local surveys<sup>6</sup> and in administrative data collection efforts by federally supported health programs. It is also the basis for current efforts by the National Center for Health Statistics to develop a sexual orientation question for federally supported health surveys.<sup>7</sup> This question, similar to questions asking about race or ethnicity, should be accompanied by appropriate training for the staff involved in collecting and processing these data to ensure that responses are accurately collected, recorded, and interpreted.

Health benefit plans shall consider the following possible responses to the question: Do you consider yourself to be...

- Straight or heterosexual
- Gay or lesbian
- Bisexual
- Something else (write in)
- C. Sex. As mentioned above, the data collected are important tools for ensuring that the Health Benefit Plans fully comply with the nondiscrimination requirements of federal

regulations and ACA §1557. Section 1557 includes protections on the basis of sex, which the Office for Civil Rights at the Department of Health and Human Services has indicated includes gender identity. In order to do so, the question regarding sex should specify sex assigned at birth, which is the sex listed on the original birth certificate. The responses to this question are the traditional concepts of sex as male or female, meaning that the question will be comprehensible to all people and that the long-term usefulness of existing sex data will not be compromised. The responses to this question are read in combination with the responses to the question on gender identity described below in order to provide accurate information on the total population.

Health Benefit Plans shall consider the following possible responses to the question: Sex assigned at birth (sex listed on the original birth certificate)?

- Male
- Female
- D. Gender Identity. Like race, ethnicity, and sexual orientation, Health Benefit Plans should consider addressing the question of gender identity. Because the Affordable Care Act prohibits rating on the basis of sex, including gender identity, and health status, including a transgender medical history, this question is purely for demographic purposes. The question described below is based on questions already in use on some state and local health surveys<sup>9</sup> and federally supported health programs. <sup>10</sup> This question should also be accompanied by appropriate training for the staff involved in collecting and processing these data to ensure that responses are accurately collected, recorded, and interpreted. Information on correctly using the gender identity question can be found in the 2012 "Guidance for HIV Surveillance Programs: Working with Transgender-Specific Data" developed by the Centers for Disease Control and Prevention. <sup>11</sup>

Health Benefit Plans shall consider the following possible responses to the question: What is your current gender identity? (Where gender identity is one's internal understanding of one's own gender.)

- Male
- Female
- Transgender, female to male
- Transgender, male to female
- E. Disability Status. The United States' Census Bureau's American Community Survey (ACS) began in the early 1990's as a vision for continuous measurement of the U.S. population and to reduce the scope, cost, and complexity of the decennial census. The ACS would replace the Census "long-form" (sample survey) and allow the decennial count to focus on "a basic headcount and minimal demographic data." During the late 1990's, the ACS tested questionnaires and operations at test sites across the United States. In 1999, the ACS adopted the disability questions being developed for the Census 2000 sample survey. Shortly after the 2000 Census, there was a growing consensus that the ACS questions on disability did not coincide with recent models of disability. The questions focused on the presence of specific conditions, rather than the impact those conditions might have on basic functioning. An interagency group was formed to develop a new set of questions which were introduced in 2008 and remain the same questions found in the current ACS questionnaires. The ACS questions cover the following six disability types; respondents who report affirmatively for any one of the six disability types are considered to have a disability<sup>12</sup>:
  - <u>Hearing difficulty-</u> Deaf or having serious difficulty hearing (asked of all ages):
    - o 16a. Is this person deaf or does he/she have serious difficulty hearing?
  - <u>Vision difficulty-</u> Blind or having serious difficulty seeing, even when wearing glasses (asked of all ages):
    - o 16b. Is this person blind or does he/she have serious difficulty seeing even when wearing glasses?

- <u>Cognitive difficulty</u>- Because of a physical, mental, or emotional problem, having difficulty remembering, concentrating, or making decisions (asked of persons ages 5 or older):
  - 17a. Because of a physical, mental, or emotional condition, does this person have serious difficulty concentrating, remembering, or making decisions?
- <u>Ambulatory difficulty-</u> Having serious difficulty walking or climbing stairs (asked of persons ages 5 or older):
  - o 17b. Does this person have serious difficulty walking or climbing stairs?
- <u>Self-care difficulty-</u> Having difficulty bathing or dressing (asked of persons ages 5 or older):
  - o 17c. Does this person have difficulty dressing or bathing?
- <u>Independent living difficulty</u>- Because of a physical, mental, or emotional problem, having difficulty doing errands alone such as visiting a doctor's office or shopping (asked of persons ages 15 or older):
  - 18. Because of a physical, mental, or emotional condition, does this person have difficulty doing errands alone such as visiting a doctor's office or shopping?

It should be noted that the U.S. Census Bureau refers to each of the individual types as "difficulty" while on DisabilityStatistics.org the term "disability" is used.
