

RFP#: MHCC 22-001

Data Management for the Maryland Medical Care Data Base (MCDB)

Addendum #3

Prospective Offerors who are known by the Issuing Office to have received the above-referenced RFP are hereby advised of the following revisions. All information contained herein is binding on all Offerors who respond to this solicitation. The revisions/deletions/additions are being identified as follows: new language has been double underlined and marked in bold (ex. **new language**) and language deleted has been marked with a strikeout (ex. ~~language deleted~~).

1. Amend RFP Section 2.2.3.4 Data Enclave, second paragraph, pg. 16

The data access environment provides complete access to all MCDB data contained in the data enclave via SQL Server and SAS. Both methods are accessed via 10-15 virtual workstations assigned to each MHCC authorized user (See Appendix 6). Both methods accommodate role-based permissions to different content (i.e., users' logins determine which content and data they have access to). The virtual workstations offer a Windows Server ~~2012~~ **2019** environment and users access virtual workstations remotely via the Federal Information Security Management Act (FISMA) compliant Citrix Netscaler, with two-factor (2FA) authentication using RSA (Rivest, Shamir, and Adelman) tokens. MHCC provides MHCC-approved users, MHCC staff and vendor analysts and programmers, with SAS licenses.

2. Amend RFP Section 2.3.2.C Data Warehouse Access

- 5) Provide role-based access to MCDB data via SAS, accessed via virtual workstations assigned to each MHCC-designated user (See **Section 2.3.2.A.2** above). This SAS access must:
 - a) ~~Provide and~~ **Host SAS 9.4 Software** ~~Server~~ license which supports a minimum of twenty (20) concurrent SAS users in the SAS access environment;

3. Amend RFP Section 3.6.1 "Insurance Requirements" as follows:

- D. Cyber Security / Data Breach Insurance – (For any service offering hosted by the Contractor) ten million dollars (~~\$10,000,000~~) **\$5,000,000** per occurrence. The coverage must be valid at all locations where work is performed or data or other information concerning the State's claimants or employers is processed or stored.
