Agenda

- I. Introductions
- II. Review of Meeting Summary for May 17, 2022
 - No changes proposed

III. Overview of Results of Mandated External Review of Elective PCI Cases

Refer to handout with summary information for CY 2018 – CY 2021

IV. Discussion of Updated Consensus Statement from SCAI

- Does anyone have concerns or questions about how the new SCAI Consensus Statement regarding PCI at hospitals without cardiac surgery on-site affects care at hospitals without cardiac surgery on-site?
- For intracoronary lithotripsy, there are hospitals that view the new SCAI
 Consensus Statement as a specific endorsement of intracoronary lithotripsy at
 hospitals without cardiac surgery on-site. How do CSAC members view this?
 Is there consensus on this issue?
- Would tracking of outcomes for PCI cases in which intracoronary lithotripsy is used at Maryland hospitals be useful?
- How should the external review of elective PCI cases change, if at all, as a result of the new SCAI Consensus Statement?
- Should a bulletin be issued that clarifies the position of MHCC staff and/or the CSAC concerning the SCAI Consensus Statement?

V. Quality Standard for Cardiac Surgery Program- COMAR 10.24.07B(4)

- How often should peer review of cases with mortality and morbidity be performed?
- Should there be a requirement for how quickly cases with morbidity and mortality are reviewed?
- Is it sufficient to require a policy be in place regarding when an external review is triggered or should there also be certain requirements about the content of those policies?
