RE: Mid-Atlantic Patient Safety Center – FY2026 Interim Report

DATE: March 5, 2026

The Maryland Patient Safety Center (MPSC) has submitted its FY2026 Interim Report summarizing recent activities and accomplishments. Submission of this report is required for our ongoing monitoring of compliance with the Commission’s Designation Agreement.

As a reminder, Maryland law authorizes the Commission to designate an organization to serve as the state’s patient safety center. In this role, MPSC develops, coordinates, and implements patient safety initiatives across Maryland. Chairperson Boyle serves on the MPSC Board.

The Commission voted during its March 20, 2025 public meeting to extend MPSC’s designation until June 30, 2027. As part of the designation requirements, MPSC must provide updates to the Commission every six months.

The 2026 Interim Report demonstrates continued compliance with the Agreement. The Report is attached for your review.
